“NO ONE IS SO GOOD THAT BASIC FIREARMS AND RANGE SAFETY RULES DON'T APPLY”

NRA Gun Safety Rules

1. ALWAYS keep the gun pointed in a safe direction.

This is the primary rule of gun safety. A safe direction means that the gun is pointed so that even if it were to go off it would not cause injury or damage. The key to this rule is to control where the muzzle or front end of the barrel is pointed at all times.

2. ALWAYS keep your finger off the trigger until ready to shoot.

When holding a gun, rest your finger on the trigger guard or along the side of the gun. Until you are actually ready to fire, do not touch the trigger.

3. ALWAYS keep the gun unloaded until ready to use.

Whenever you pick up a gun, immediately engage the safety device if possible, and, if the gun has a magazine, remove it before opening the action and looking into the chamber(s) which should be clear of ammunition

- **Wear eye and ear protection as appropriate. This includes spectators**
- **Never use alcohol or over-the-counter, prescription or other drugs that may cause impairment before or while shooting.**
- **Know how to use the gun safely.**
- **Be sure the gun is safe to operate.**
- **Use only the correct ammunition for your gun.**

ALWAYS treat all firearms as if they are loaded!
